Addis Ababa, Ethiopia

STRENGTHS

Time Management

Ability to deliver high-quality software under tight deadlines.

Security Expertise

Strong focus on security in application design and implementation.

Team Collaboration

Excellent communication skills for collaborating in diverse teams.

Fast Learning

Quickly adapts to new technologies, frameworks, and complex problem scenarios.

KEY ACHIEVEMENTS

System Maintaining

Successfully rebuilt and modernized a full enterprise platform (Aesop Meredaja) from legacy native PHP into a secure, scalable architecture using Laravel, React, and PostgreSQL reducing security risks, improving performance, and enabling long-term maintainability. plus with documentation.

Password Vault Achievement

Developed a secure zero-knowledge password vault, personally to get my credential on internet securely.

HAILEGIORGIS WAGAYE

FULL-STACK DEVELOPER | SOFTWARE ENGINEER

SUMMARY

As a full-stack developer and software engineering student, I excel in building secure, scalable systems using a range of modern technologies. My experience encompasses developing complex enterprise applications and I thrive on tackling challenging problems with innovative solutions. I have a rich experience in cryptography, API design, and cloud deployments, making me a valuable asset to any tech team.

EXPERIENCE

Aesop Ethiopia

Addis Ababa,
Ethiopia

Full-Stack Developer

09/2024 - Present

A technology company focused on creating innovative solutions for connecting innovators with investors.

- Providing technical support and development for Aesop Meredaja system.
- Implementing advanced security features and infrastructure upgrades.
- Handling deployment, maintenance, and scaling strategy.
- Leading the rebuild and modernization of the core platform.

Freelance

Addis Ababa,
Ethiopia

Freelance Software Developer

07/2023 - Present

Self-employed software developer providing services to clients.

- Developed multiple production systems for clients and personal projects.
- Delivered full-stack applications from requirements to deployment.
- Managed deployments on Vercel, Render, Neon, and VPS servers.
- Built secure, optimized APIs and modern React interfaces.
- Collaborated with teams at Roha Systems on SaaS solutions.

EDUCATION

Adama Science and Technology University (ASTU)

Adama, Ethiopia

Bachelor of Science in Software Engineering

07/2022 - 05/2026

LANGUAGES

ENGLISH

Advanced

AMHARIC

Proficient

hgiorgis

SKILLS

Hard Skills

Laravel • React • TypeScript • Docker •
APIs • Tailwind CSS • PostgreSQL •
MySQL • ExpressJS

Tools & DevOps

Git • Docker • Nginx • CPanel • Render •
Vercel • Linux Server Management •
TOTP • Encryption/Decryption •
Zero-Knowledge Storage •
Cryptography Concepts

Soft Skills

Problem-Solving • Team Collaboration •
Time Management

INTERESTS

• Open Source Contributor

Enthusiastic about contributing to open-source projects and engaging in tech community activities.

• Tech Enthusiast

Avid learner, constantly exploring new programming languages and technologies through personal projects.

PROJECTS

Aesop Meredaja

09/2024 - Present

Tech: Laravel • React • TypeScript • Tailwind CSS • PostgreSQL • REST API • TOTP

A Client Project complex platform connecting innovators with investors, providing secure project sharing, communication, and investment workflow. Originally built in native PHP and later fully rebuilt into a modern full-stack framework with improved security and performance. To see more aesopmeredaja.com

- Developed an innovative platform connecting investors with innovators.
- Developed a secure messaging system using cryptographic techniques.
- Created a project protection workflow with controlled visibility.
- Integrated payment gateways including PayPal and Chapa.
- Deployed the system on CPanel (legacy version) and migrating to Render/secure hosting.

Snkrypt

11/2025

Tech: Laravel (Sanctum) • React • PostgreSQL • Cryptography • Neon • Render

Password management system that uses modern cryptographic techniques to keep user data secure. To see more snkrypt.pro.et

- Created a zero-knowledge password vault providing enhanced security for users.
- Increased data by implementing client-side encryption for user data confidentiality.
- Developed a [firefox browser extension](#) for better user experience.

Alkore – Habit & Productivity Management System

01/2024

Tech: React • Express.js • MySQL

A Solo Project productivity tool focused on habit tracking, task management, and streak monitoring. To see more alkore.pro.et

- Habit tracking with a daily streak system.
- Task management with timelines.
- Push notifications for reminders.
- Responsive UI with a clean productivity dashboard.
- Fast and lightweight backend.

KD Poultry Farm Reporting System

04/2024 - Present

React • Express.js • MySQL (moving to MongoDB)

A data-driven reporting platform built for a poultry farm with 1,000 hens to track performance, expenses, and profitability. To see more kdpoultry.pro.et

- Daily production and sales logging.
- Visual analytics: charts, graphs, and tables.
- Simple interface for non-technical users.
